

GS RANGE

GS spindles are belt-driven spindles suited for grinding, boring, milling, turning and drilling applications.

A pulley is incorporated directly into the spindle shaft to create a single compact unit. This unit is then carefully balanced to remove traces of vibration.

The spindles generally feature precision angular contact bearings to maximise stiffness of the spindle while minimising temperature rises.

Belt-driven spindles can be supplied for operation at alternative speeds. For speeds other than the standard the pulley can be redesigned to suit a preferred speed.

Spindles are designed for a specific configuration although they can be supplied to run horizontally; vertically or at any angles if required.

TECHNICAL DATA

DIMENSIONS (L x W x H OR ØD x L)	370 x 200 x 180 mm	14.6 x 7.9 x 7.1 in
MAX SPEED	6500 RPM	
ROTATION	DUAL	
LUBRICATION	GREASE	
TOOL INTERFACE	HSK	
COOLING	AIR	
ORIENTATION	HORIZONTAL	
BODY TYPE	PRISMATIC
